

Cranford Controls' range of Magnetic Door Retainers

The Cranford Controls' range of Door Retainers has been designed to meet a wide range of applications across the Fire and Security industries. They are available with either plastic or metal bodies for either floor, wall or pole mounting.

The Acoustic Wireless Door Holder

Overview

The acoustic door holder provides a simple, quick fit solution to safely hold open fire doors using intelligent software designed to eliminate false activation. It is similar in size and appearance to a traditional door holding magnet, wall mounted behind the door, out of sight and harms way. The holder is battery powered and needs no wiring, being triggered by the sound of the fire alarm.

- Digital, acoustically triggered, battery powered, magnetic door holder
- CE marked under the CPR to hold open Size 5 doors
- 2 x "C" cell batteries, 12 months life
- Mounts behind the door avoiding accidental damage
- Intelligent learning function gives a digital release profile unique to the alarm sound at the door
- Avoids nuisance false releases from other noises
- Default setting for approximately 70dB(A) volume of a typical sounder
- Battery life indication and low battery warning
- Can be set to automatically release daily at set times
- 200N holding force
