

STI Enviro Stopper®

KEY FEATURES

General Information

- Protective cover is ideal for extending the life and reliability of devices exposed to harsh environments.
- Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

Design

- Cover, back box and sealed mounting plate achieves IP66 (back box) and IP56 (cover) rating.

Construction

- Tough polycarbonate housing can withstand the severest of knocks.

Installation

- Ideal for use in wet or wash down areas, overall rating of IP56/IP66 for the back box.
- Can accommodate a standard European call point or switch.
- Polycarbonate tested -40°C (-40°F) to 121°C (250°F).

Electronics

- Available with or without a 95 dB integral sounder, powered by a 9V PP3 battery (included).

Options

- Break seal facility option for added security.
- Available in a range of colours.
- Custom labelling available.

PRODUCT OVERVIEW

A protective cover that is ideal for extending the life and reliability of devices exposed to harsh environments. It offers protection to manual call points and switches against dust and water ingress both outside and inside, as well as preventing tampering, vandalism and damage from accidental or malicious operation.

HOW IT WORKS

Easy to install, the Enviro Stopper consists of a clear, tamperproof, tough polycarbonate cover and back box that can accommodate a standard European call point or switch. When the cover is closed, the unit is sealed and achieves a rating of IP66/56, preventing dust, grime and water getting to the device.

Cranford Controls is an approved distributor of the range of STI products.
